# MODEL KIT CATALOGUE

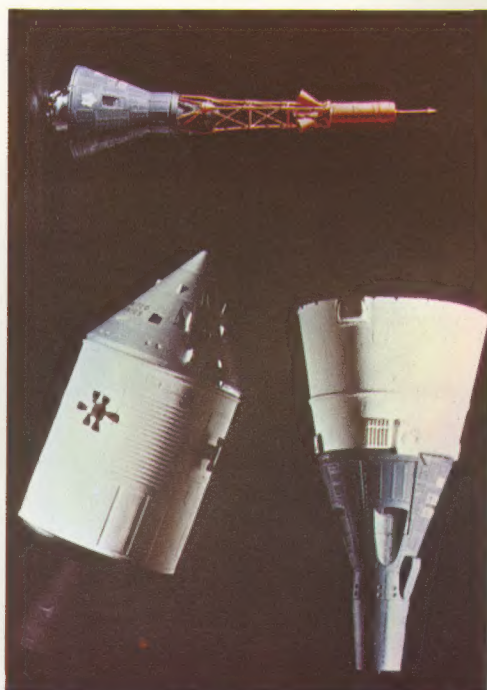

**H1861 TRANQUILLITY BASE** available April Scale 1/48  
Man's first base on the moon. This exacting scale model of the Apollo 11 Lunar Module separates into ascent and descent stages and includes two astronaut figures (one stepping on to the moon!) An American flag, clear windows, detailed thrusters and antenna and official NASA markings are also featured.

**H1862 APOLLO 11—COLUMBIA & EAGLE** Scale 1/96  
The spacecraft that first took man to the moon! Here is the highly detailed model of Apollo 11 command ship "Columbia" and lunar module "Eagle". Three Astronaut figures (one stepping onto the moon!) are included. Comes complete with simulated lunar surface base with special support arm for the orbiting Columbia, also clear windows and official NASA markings. available April

**G1855 ADVENTURE IN SPACE: APOLLO & GEMINI** available March  
Three complete kits that accurately illustrate the Apollo and Gemini programme. The Apollo spacecraft, including the Lunar Module is 1/48 Scale. The Gemini spacecraft is 1/24 scale, and the Gemini Astronaut is over 12 inches high. This collectors set includes cement, paint and paint brush.

**H1847 AMERICAN SPACE PIONEERS** Scale 1/48  
Manned space flight in models! All three in one kit combining the MERCURY spacecraft (America's first manned satellite) plus the GEMINI spacecraft plus APOLLO. Display stands included for all three models plus an 8 page historical booklet. available March

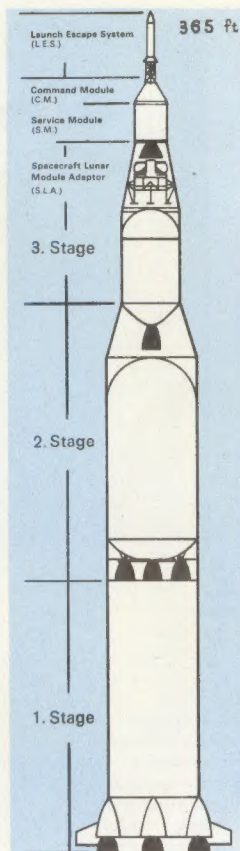

**H1843 APOLLO/SATURN V MOON ROCKET**

Scale 1/96

Here is the complete Apollo/Saturn V system that sends American astronauts to the moon! A sensational model that is almost FOUR FEET HIGH! Includes escape tower, command module, service module, lunar module and all three stages of the Saturn V rocket plus base.

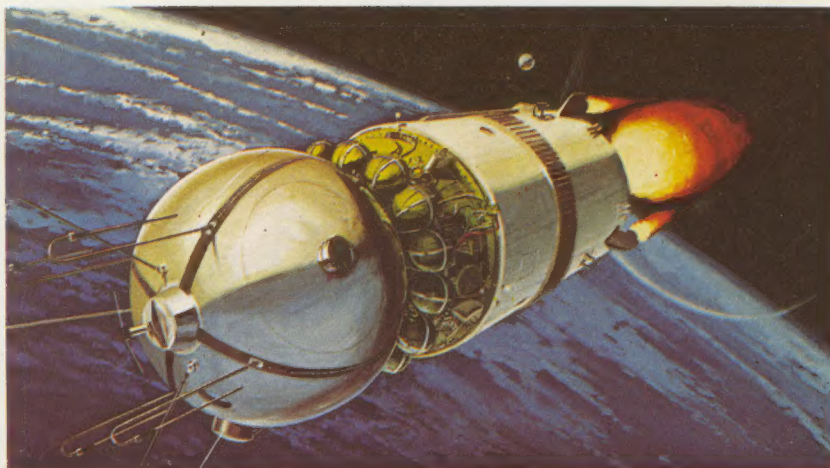

**H1836 APOLLO LUNAR SPACECRAFT**

Easy to assemble 1/96th scale model with detachable Command and service modules, separable lunar module and unique panoramic "moon surface".

**H1841 ASTRONAUT FIGURE**

This 6" high model shows all the intricate space walk equipment which made the miracle possible with all the fascinating space gear detailed in scale.

**H1844 RUSSIAN VOSTOK**

Scale 1/24

Russia's first manned spacecraft. Major Yuri Gagarin, Russian Cosmonaut, became the first man to orbit the earth in this historic spacecraft. Realistically detailed with ejecting seat and detachable crew compartment.

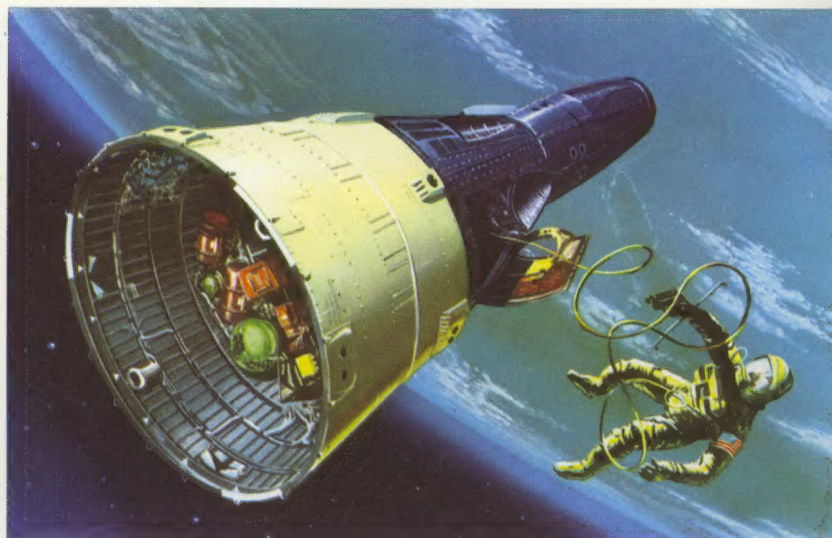

## H1833 FRIENDSHIP 7 — MERCURY CAPSULE WITH ATLAS BOOSTER

Scale 1/110

Lieut. Col. John Glenn Junior made three earth orbits in the famous Friendship 7. This fantastic model includes launching bays, ramp and pad. Tractor transports, Nitrogen trailer and illustrated booklet and flight log.

## H1835 GEMINI CAPSULE

Scale 1/24

As you build your Revell model of Gemini, you will appreciate the excitement of the explorers of the ultimate. Crew compartment is detailed, features space twins in flight suits, seated side by side in orbit position. Cabin hatches hinged for opening, so distinctive particulars of cabin interior can be displayed, or interior can be viewed through clear windows. Removable retrograde section, detachable equipment module.

## H1834 MERCURY ROCKET AND GEMINI SPACE VEHICLE

Scale 1/48

Two exact Revell scale replicas of America's manned space vehicles, Mercury and Gemini. Panels are removable to reveal highly-detailed interiors. Complete with astronaut figures, authentic decals and facts booklet.

## H1838 APOLLO LUNAR MODULE

Scale 1/48

The entire Apollo system! Command and service module. Interiors visible. Legs of lunar module fold and unfold into space adapter section. Clear plastic windows. Five astronaut figures. Official NASA markings. Display stand. Two space booklets.

# Historical Sailing Ships

## H346 CHARLES MORGAN

The greatest whale hunter of them all! This ship is the only wooden whaler to survive the perils of weather, whales and wanderings over the oceans of the world — 80 years in all. Preserved at Mystic Seaport, Connecticut.

## H336 SANTA MARIA

Columbus' flag ship to the New World. Colourful and courageous as her famous skipper. A brilliant model superbly detailed. When finished it measures 11½" long. Complete with captain, crew, full rigging, realistic plastic sails, guns, anchors, pennants and lifeboat with oars.

## H324 GOLDEN HIND

Commissioned to plunder Spanish possessions in the New World, the Golden Hind, under the command of Sir Francis Drake set sail from England in 1577.

This historical vessel — 13" long — is reproduced in every exacting detail.

## H327 MAYFLOWER

A magnificent model 14½" long of the ship which carried John Alden and 40 fellow pilgrims across the Atlantic in 1620, finally reaching a New World harbour now known as Plymouth, Massachusetts. Scale 1/105

## H328 HMS BEAGLE

model measures 14½" long.

## H364 'JOLLY ROGER'

Straight out of the pages of Peter Pan, this Revell model captures all the whimsical fantasy that Sir James M. Barrie wrote into his original novel. Length 7½".

## H329 USS CONSTITUTION Length 16".

Scale 1/146.5

available September

**H344 FLYING CLOUD**

**H363 HMS VICTORY**

**H347 U.S.C.G. CUTTER 'EAGLE'**

**H395 CUTTY SARK WITH SAILS**

Length 36" Scale 1/96

A striking Revell model of the world-famous Cutty Sark—last example of the proud era of fast clipper ships that did so much for world commerce. Features include three-colour moulding, pre-formed ratlines, 20 crew figures, plus official Cutty Sark brochure.

Also available.

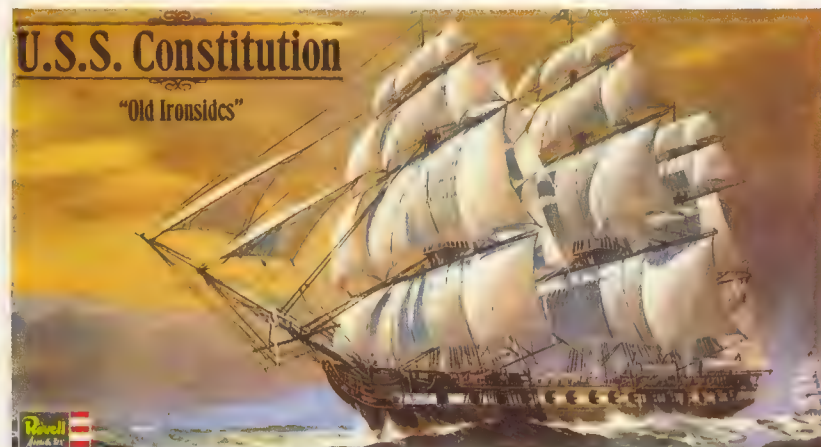

**H394 CUTTY SARK WITHOUT SAILS**

**H399 PEDRO NUNES**

Length 36". Scale 1/96

A stirring sight when she sailed the Tagus River out of Lisbon . . . and a spectacular model for builders of great ships. This sailing barque has all the special features of the actual ship where Portuguese sailors learned their trade of the sea.

**H398 U.S.S. CONSTITUTION WITH SAILS**

Length 36". Scale 1/96

The oldest (1797) commissioned ship in the U.S. Navy, the U.S.S. Constitution has been immortalized as "The Eagle of the Sea" for its outstanding service record. It was one of the strongest ships ever built.

Also available

**H386 U.S.S. CONSTITUTION  
WITHOUT SAILS**

## H390 CLIPPER SHIP THERMOPYLAE

Length 36". Scale 1/96.  
This authentic kit is a classic example of Revell attention to detail. Meticulous care has been taken over even the smallest items like the rail stanchions and special instructions are also included on how to put an 'antique' finish to the model to make it a real museum piece.

## H391 U.S.S. KEARSAGE

Length 33½". Scale 1/96.

A superb kit making an authentic model of the historical U.S.S. Kearsage which took an active part in the American Civil War. Complete with 20-page step-by-step assembly booklet, instructions for giving finished model that 'antique' look, complete rigging guide and full crew in action poses.

## H392 C.S.S. ALABAMA

Length 33½". Scale 1/96.

Action-packed replica of the famous Confederate Civil War vessel C.S.S. Alabama. Kit comes complete with detailed 16-page step-by-step assembly booklet, painting instructions for authentic 'antique' finish, rigging guide and crew members in action poses. Perfect partner for the U.S.S. Kearsage.

## H361 YACHT AMERICA

A magnificent 24" model of the world famous racing yacht. This ship, rich in sail, makes a spectacular display model. Features time-saving interlocking deck and hull assembly, detailed cabins, moulded in one-piece deck, simplified assembly of mast and booms, easy to rig sails.

available March

## Classics in Sail

### H362 USS CONSTITUTION

available June

Handsome 22" model of the most famous ship in early American history.

### H368 CUTTY SARK

24" model

History's most romantic merchant sailing ship set records her rivals could not equal. Of all the great clipper ships of the 19th century only the Cutty Sark survives today and is berthed in a place of honour at Greenwich, England.

Always use Revell cement to build your model and a Revell special paint set to give it the high standard of finish it deserves.

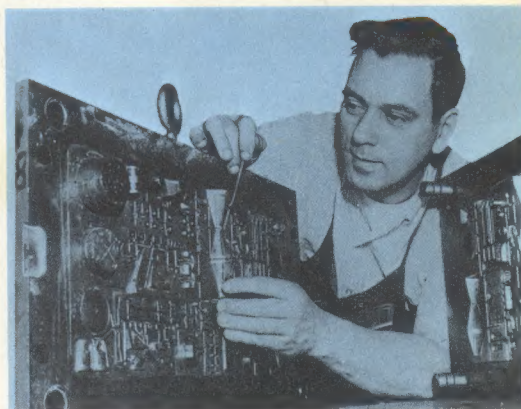

## THE REVELL STORY

Each product presented to you in these pages is a distinctive chapter in the continuing story of Revell. In the early '50's, Revell introduced the world's first scale model plastic car kits. They brought the bright concept of practical convenience and availability to the age-old adventure of model building. A new industry was born — and a new hobby discovered by millions. Those early car kits blazed the trail for the great variety of Revell models available today of man's most spectacular vehicular achievements on earth, sea and sky and beyond his world. Currently, Revell manufactures more than 300 different items and in its 27 year history has produced more than 210,000,000 units. Revell products are manufactured in eight countries including the United States and sold in more than eighty. Our headquarters is located in Venice, a suburb of Los Angeles, U.S.A. Over 500 people are employed there.

Though a Revell kit can be purchased in a hobby, chain or department store for only a few shillings, the master mold for the model costs between £20,000 and £40,000. Every proposed kit requires research and development, planning, engineering, manufacturing, packaging, advertising and marketing. Its selection must be exacting.

Just what does it take to manufacture a model kit? The way it happens at Revell goes something like this . . .

you, the consumer, many times write in with suggestions as to what model kits you would like us to make. These suggestions are passed along to our Research and Development Department. They evaluate these suggestions and make recommendations to the Revell management team. If the management team approves the project, they forward the recommendation along to the Revell engineering staff. An engineer is then assigned to the project and will be responsible for designing this model in such a way so that it will be economical to manufacture and practical to assemble.

From detailed engineering specifications, a hand-built original model must be created. From this original model, plaster and epoxy molds are made. These molds are then used as patterns for the steel tools and dies which are cut on pantograph machines. Finally, the steel dies are hand finished, placed in a mold base, and installed in an injection molding machine. This machine can turn out a kit in thirty seconds that has been in the research, development and engineering stage for almost a year.
